Education

Bachelors in Information Technology from K. J. Somaiya College of Engineering

CGPA: 8.56 (2017 – 2021)

Skills

OS/ CLOUD	Windows (7, 8, 10, 11); WSL 2 (with Ubuntu 18.04, 20.04); Ubuntu (16.04, 18.04, 19.04, 20.04); Ubuntu Server (18.04, 20.04); Kali (2019, 2021); Raspbian OS; AWS, Azure, GCP, IBM Quantum
LANGUAGES	Python, HTML, CSS, JS, SQL, Matlab, C, C++, Java, Bash
TOOLS / LIBRARIES	Git, Computer Vision (OpenCV, PIL), Frameworks (Django, Flask), Web Scraping (BeautifulSoup), numpy, pandas, sklearn, keras, tensorflow, MATLAB, Simulink (Simscape Multibody, Simulink), Docker, AWS (EC2, Lambda, S3, RDS, Route 53, IAM), Azure (Virtual Machines, Cognitive Services, App Service, Blob Storage, IAM), GCP (Big Query, Compute Engine, App Engine, Cloud Pub/Sub, Container Engine), Qiskit
DATABASES	PostgreSQL, MySQL, SQLite, MongoDB
APPS / IDE	VSCode, IDLE, Eclipse, Arduino IDE, Blender, Unity

Experience

Analyst (Internship) - Cyber Peace Foundation: Dark Web and Social Media Investigation MAR 2020 – AUG 2020

Automation of investigation and analysis process by development of a crawler. Modules to analyze text, and media content were developed and used successfully.

Developer (Internship) - CoView, Hospital management system

MAY 2020 – AUG 2020

Developed and deployed Django application for KEM Hospital, Mumbai to monitor patients during the COVID-19 pandemic. The project focuses on data cleaning, data analysis on the dashboard, and patient management aspects.

Projects

Memories – Python Library	MAY 2021 – CURRENT
<i>Creator and maintainer for Open-Source Python Library <u>Memories</u> for Image Segmentation and Image Metadata management. Library has over 7000 downloads as of date.</i>	
Crowdsourcing based optimization of Medical Resources attending demand equalization	JUL 2020 – MAY 2021
<i>Creation of an ML-based tool which employees resource crowdfunding for and amongst hospitals. It extends into the creation of hospital management software as well.</i>	
CoView: Hospital management system	JUN 2020 – SEPT 2020
<i>CoView cleans and combines data from different departments of the Hospital and monitors the trends to assess the situation. It provides quick, easy and basic analysis for the hospital.</i>	
Landscape Analysis for OCSA and OCSE	OCT 2019 – FEB 2020
<i>Work on the trends and different forms of Online Child Sexual Abuse and Exploitation (OCSA & OCSE) as the penetration of online technology has amplified. Project funded by a grant of USD 91,666.80 from Children's Investment Fund Foundation (CIFF) in the UK.</i>	
MALANG: Malware Analysis Generator	MAR 2019 – SEPT 2019
<i>Creation of an architecture that finds an application on google play stores alternatives (APKmirror, Aptoid, etc) and compares the versions and software for the apps on the other stores.</i>	
Project Chakravayuh	SEPT 2018 – OCT 2020
<i>Development of a dark-web crawler that incorporates crawling, scraping, text-analysis, media-analysis, form-filling, website activity tracking. Project presented and praised by various LEAs apnd companies like Facebook.</i>	
Physical Simulations for Mobile Robots	JUN 2018 – MAR 2019
<i><u>Simulations</u> made at Team KJSCE Robocon for Robocon-2019 competition. Simulations include path planning for a swerve drive system and a projectile mechanism.</i>
